Summary

With 7+ years as a software developer, I've remotely collaborated with agencies and startups, creating impactful digital products.

Fueled by curiosity and a drive for growth, I approach projects with confidence, strong communication, and a problem-solving mindset.

Experience

Senior Software Engineer

Dorik • Sylhet
01/2023 - Present

- **Lead and manage** a team of back-end engineers, providing technical guidance, mentorship, and overseeing project deliverables.
- **Conduct** thorough code reviews to ensure adherence to best practices, maintainability, and quality standards.
- **Design and implement** complex, scalable, and high-performance back-end architectures and systems.
- **Technologies:** Node.js, Express.js, MongoDB, GraphQL, RabbitMQ, Terraform, AWS, Redis

Lead Front-end Developer

Relantin • Remote
11/2021 - 10/2022

- **Managed and assigned tasks** while reviewing pull requests (PRs) from team members to ensure code quality and alignment with project goals.
- **Planned, scheduled, and prioritized tasks** to minimize bottlenecks and ensure smooth project progression throughout its lifecycle.
- **Structured frontend architecture** and implemented state management solutions to optimize application performance and scalability.
- **Technologies used**: Vue, Nuxt, React, Next, TypeScript, SolidJS

Front-end Developer

Rootsoft IT • Sylhet, Bangladesh
02/2021 - 10/2021

- **Collaborated with cross-functional teams** to plan, design, and develop web applications, ensuring alignment with user and business requirements.
- **Designed and implemented reusable, modular components** and code blocks, integrated APIs, and delivered core features to enhance application functionality.
- **Optimized application performance** using Nuxt.js server-side rendering (SSR)
- **Technologies used**: Vue.js, Nuxt.js

Frontend VueJs Developer

Sidy • Remote
03/2020 - 08/2020

- **Designed intuitive user interfaces** and collaborated with UX/UI designers to implement responsive layouts using Pug and Vuetify.
- **Built modular Vue.js 2 components** with TypeScript, reducing redundancy and improving code maintainability
- **Integrated RESTful APIs** with robust error handling and data validation, ensuring seamless frontend-backend communication
- **Technologies used**: Pug, Vue.js 2, Vuetify, TypeScript

Co-Founder & Software Engineer

HuddleByte • Sylhet
09/2019 - 03/2020

- **Co-founded** and **bootstrapped** a digital agency, delivering end-to-end web solutions for startups and SMEs while managing technical, operational, and client-facing responsibilities.
- **Operated** as a hands-on **full-stack engineer**, designing and developing client projects from concept to deployment while mentoring a lean team of 2–3 developers.

Web Developer

Online Marketplace
03/2018 - 08/2019

- **Developed a scalable e-commerce platform** using the MEVN stack, streamlining product discovery, checkout, and payment integrations.
- **Built a POS web app** for merchants, enabling inventory tracking.
- **Developed an E-Patient Health system** with appointment scheduling using Vue.js and Node.js.
- **Collaborated with cross-functional teams** to align technical solutions with business needs and deadlines.

Education

Bachelor in Computer Science and Engineering

Leading University • Sylhet, Bangladesh
02/2018
Relevant Coursework: **Computer Programming, Data Structures & Algorithms, OOP, Computer Architectures, OS, AI, Networking**

Freelance Projects

CRM Project
Digital Solutions Provider | *Oct 2022 – Feb 2023*

- **Led a team of 4 developers**, providing technical direction, mentorship, and code reviews to ensure alignment with project goals and deadlines.
- **Designed reusable UI components** and standardized frontend architecture, reducing development time by 25% for subsequent features.
- **Integrated RESTful APIs** with robust error handling and data validation, improving system reliability and user experience.
- **Technologies**: Vue.js, TypeScript, Node.js, Express.js, MongoDB

V4krk

Web Application Development | *Aug 2021 – Dec 2021*

- **Engineered a full-stack web application**, building both the frontend (Vue.js, Nuxt.js) and backend (Node.js, Express.js, MongoDB) from scratch.
- **Developed a feature-rich admin dashboard** with real-time analytics, user role management, and data visualization tools to streamline client operations.
- **Optimized API performance** by implementing caching and efficient database queries, reducing average response times by 35%.
- **Technologies**: Vue.js, Nuxt.js, Node.js, Express.js, MongoDB

Skills

Frontend:
JavaScript, TypeScript, Vue.js, Nuxt.js, React, Next.js, SolidJS, Vuetify, Pug, State Management (Vuex/Pinia/Redux)

Backend:
Node.js, Express.js, RESTful APIs, GraphQL, RabbitMQ, MongoDB, Redis

DevOps & Cloud:
AWS (ECS, EC2, Lambda, etc.), Terraform, CI/CD Pipelines, Docker
